Montana Healthcare Programs Notice

All Provider Types

United States 2010 Census

We are rapidly approaching the 2010 Census, which will provide a once-in-a-decade snapshot of Montana's population. This March every Montana household will receive and be asked to answer a short census form of just 10 questions. DPHHS serves many people who are at risk of not being counted which makes our support of the census process even more important. Census data among other things helps determine the allocation of federal funds, which are a critical funding source for many of the programs and services offered by the Department. Between now and the end of July 2010 we are asking you to display in your office the attached Census 2010 poster to assist in delivering the message of the importance of completing the 2010 Census form.
