ICD-10 Provider Training

August 2015

Jennifer Tucker, CPC

Coordinator,
ICD-10 Conversion Project
Montana MMIS

What Is ICD-10?

<http://youtu.be/ZPDgtDDTc8k>

ICD-9-CM
September 2014

ICD-10-CM
October 2014

821.11 - Open fracture of shaft of femur.

ICD-10 Will Change Everything

Will You Be Ready?

AAPC can help every aspect of your practice's transition to ICD-10. Whether you just want the basics or need complete implementation training, AAPC has a solution to fit your needs.

Physicians

- Documentation: The need for specificity drastically increases by requiring secondary stages of healing, weeks in pregnancy, episodes of care, and much more.
- Code Training: Codes increase from 17,000 to 140,000. Physicians must be trained.

Nurses

- Denial: Every order must be detailed or annotated.
- Documentation: Must use increased specificity.
- Prior Authorization: Policies may change, requiring training and updates.

Lab

- Documentation: Must use increased specificity.
- Reporting: Health plans will have new requirements for the ordering and reporting of services.

Billing and Procedures

- Denial: All paper reimbursement policies may be outdated.
- Training: Billing department must be trained on new policies and provisions and the ICD-10-CM code set.

Coding

- Code Set: Codes will increase from 17,000 to 140,000. As a result, code books and codes will completely change.
- Clinical Knowledge: More detailed knowledge of anatomy and medical terminology will be required with increased specificity and more codes.
- Consent/Release: Coders may need to use ICD-9-CM and ICD-10-CM concurrently for a period of time until claims are received.

Clinical Area

- Patient Encounter: Health plan policies, payment limitations, and new ICD-10 coding on files.
- Legibility: Electronic medical and paper records may be impossible.
- ADMs: Health plans will revise all policies linked to ICD-9-CM, so ADMs have to be reworked and patients will require education.

Managers

- New Policies and Procedures: Health plan policies, payment limitations, and new ICD-10 coding on files. Disease management, tracking, or FGI may be revised.
- Vendor and Paper Contracts: All contracts must be evaluated and updated.
- Budgets: Changes to software, training, new contracts, new payments will have to be paid for.
- Training Plan: Everyone in the practice will need training on the changes.

Front Desk

- ADMs: Primary policies must be revised and patients will need to sign the new forms.
- Patients: Updates to systems are likely required and may impact patient encounters.

Changes in ICD-10

- * Injuries are grouped by anatomical site rather than type of injury.
- * Certain diseases are reclassified to different chapters to reflect current medical knowledge.
- * New code definitions
- * ICD-9 V codes and E codes are incorporated into the main classification.
- * Changes in terminology (PCS)

Number of Codes

Clinical Area	ICD-9 Codes	ICD-10 Codes
Fractures	747	17,099
Poisoning and toxic effects	244	4,662
Pregnancy related conditions	1,104	2,155
Brain Injury	292	574
Diabetes	69	239
Migraine	40	44
Bleeding disorders	26	29
Mood related disorders	78	71
Hypertensive Disease	33	14
End Stage Renal Disease	11	5
Chronic Respiratory Failure	7	4

New Features of ICD-10

- * Laterality (Left, Right, Bilateral):
This will not change the need for LT/RT modifiers.
- * Combination codes
- * Obstetric codes identify trimester instead of episode of care.
- * Character placeholder of "X" to allow for future expansion.
- * Two types of excludes notes
 - * Excludes 1: Code should NEVER be used.
 - * Excludes 2: Condition is not part of the condition represented by the code but a patient may have both conditions at the same time.

Duplicate Codes

Duplicate ICD-10-CM and ICD-9-CM Codes

With code decimals removed, there are 39 codes that are duplicated between ICD-10-CM and ICD-9-CM, with each duplicate having a vastly different meaning. We bring this to your attention in order to minimize any confusion if dealing with data that contains codes that do not have decimal places.

ICD-9 CM	Description	ICD-10 CM	Description
E030	Unspecified Activity	E03.0	Congenital hypothyroidism with diffuse goiter
E802.0	Railway accident involving derailment without antecedent collision injuring railway employee	E80.20	Unspecified porphyria
E830.0	Accident to watercraft causing submersion injuring occupant of small boat, unpowered	E83.00	Disorder of copper metabolism, unspecified
E833.1	Fall on stairs or ladders in water transport injuring occupant of small boat, powered	E83.31	Familial hypophosphatemia
E835.9	Other and unspecified fall in water transport injuring unspecified person	E83.59	Other disorders of calcium metabolism
E896	Accident caused by controlled fire in other and unspecified building or structure	E89.6	Postprocedural adrenocortical (-medullary) hypofunction

****Note: This is not an all inclusive list**

	ICD-9-CM	ICD-10-PCS
Code length	3-4 characters	7 alpha-numeric characters, all are required
Number of codes	Approximately 4,000 codes	Approximately 72,000 codes
Expandability (space for new codes)	Limited	Flexible
Code detail	Limited detail	More detail definitions on anatomy site, approach, device, and other information
Example of codes	741 Low Cervical C-Section	10D00Z1 Obstetrics, Pregnancy, Extraction, Products of Conception, Open Approach, No Device, Low Cervical

Record Keeping Tip

Healthcare professionals are encouraged to begin documenting in detail the events of the service. Increased documentation of patient conditions guide the physician to specific details about diagnoses.

This will result in increased specificity in order to code records seamlessly for ICD-10 and ultimately minimize the impact to billing and denials making an easier transition for your practice.

What is Montana Doing?

- * Our team consists of: Xerox, Department Staff, Certified Coders, and the two Project Coordinators.
- * We identified all areas where ICD-9 was currently being addressed or used in the policy manuals, state plan and administrative rules.
 - * We are currently in the process of completing updates to these areas.
- * We are working with the Xerox programming staff to test the system internally based on the updates for ICD-10.
- * We estimate the ability to test with providers beginning late May early June.
 - * If you are interested in testing, and have not notified us already, please send an e-mail to Beverly Hertweck at bhertweck@mt.gov.
