Physician Administered Drugs – Update NDC Requirements

The Federal Deficit Reduction Act of 2005 mandates that all State Medicaid Programs require the submission of National Drug Codes (NDCs) on claims submitted with certain procedure codes for physician-administered drugs. This mandate affects all providers who submit claims for procedure-coded drugs both electronically and manually.

Montana Medicaid requires all claims submitted for physician administered drugs to include the appropriate NDCs and corresponding CPT/HCPCS codes. The following HCPCS codes will now be required to be billed with an NDC:

- J7323 Hyaluronat Euflexxa
- Q9957 Perflutren Protein
- Q9965 Omnipaque
- Q9967 Omnipaque
