Physician, Mid-Level, and Psychiatrist Providers

Effective October 1, 2019

Medication-Assisted Treatment (MAT) Bundled Rates

MAT is the use of medications approved by the US Food and Drug Administration (FDA), in combination with behavioral therapies and support services, to provide a whole-patient, patient-centered approach to the treatment of alcohol and opioid use disorders. There are two types of qualified MAT providers:

(1) Opioid Treatment Program (OTP), is an accredited treatment program with SAMHSA certification and Drug Enforcement Administration (DEA) registration to administer and dispense opioid agonist medications, including Methadone, that are approved by the FDA to treat opioid addiction. OTPs must provide medical, counseling, vocational, educational, and other assessment and treatment services, either onsite or by referral to an outside agency or practitioner through a formal agreement, as identified in the members Individualized Treatment Plan (ITP); or

(2) Office-based Opioid Treatment (OBOT), which is an organization that employs or contracts with a provider who holds a current Drug Addiction Treatment Act of 2000 (DATA) waiver with SAMHSA and has been assigned a DEA identification number for buprenorphine prescribing for opioid use disorders. OBOTs may only provide buprenorphine opioid treatment. OBOTs must provide medical, counseling, vocational, educational, and other assessment and treatment services, either onsite, or by referral to an outside agency or practitioner through a formal agreement, as identified in the member’s ITP.

MAT providers will be required to bill two (2) bundled sets of services; MAT Intake for the first week and MAT Established weekly thereafter (see below) contingent on the member meeting the medical necessity criteria. Services prior to intake and post discharge will be billed outside of the bundled rates. Counseling is not included in the bundled rates and if a member accepts a referral, it may be billed separately. Clinically appropriate medications are not included in the bundled rates and are reimbursed outside of the bundled rates.
