

MONTANA HEALTHCARE PROGRAMS NOTICE

December 21, 2020

Outpatient Hospital, Physician, Nutritionist/Dietician, Mid-Level, RHC, FQHC, IHS, Public Health Clinic, and Critical Access Hospital Providers

Diabetes Prevention Program (DPP) Information

More than one in three US adults have prediabetes and about 84% don't know it. A proven way to delay or prevent the progression of prediabetes into type 2 diabetes is to participate in the National Diabetes Prevention Program (DPP). The National DPP is a proven lifestyle change program. Class members learn to eat healthfully and increase exercise habits to help them lose weight. The program is:

- 12 months long – weekly sessions the first 6 months of the program and monthly sessions the second 6 months of the program.
- A group-based program which provides support and accountability to all class members.
- A trained lifestyle coach leads all classes.
- Classes are delivered in-person as well as virtual (online, distance learning).

[For more information about the National DPP, visit the Montana DPP Story Map.](#)

Who qualifies as a participant of the DPP?

- Patients qualify for the DPP with a diagnosis of prediabetes (Fasting glucose of 100-125 mg/dL **OR** A1C between 5.7% and 6.4%);
 - **OR** by meeting other program eligibility criteria below:
 - Adults 18 years or older with a body mass index (BMI) of 25 or greater (23 or greater if Asian) **plus one or more** of the following risk factors for heart disease and type 2 diabetes:
 - - Blood pressure of at least 130/80 mmHg or treatment
 - Triglycerides greater than 150 mg/dL
 - LDL cholesterol greater than 130 mg/dL or treatment
 - HDL cholesterol less than 40 mg/dL for men, less than 50 mg/dL for women
 - History of gestational diabetes mellitus
 - Score 5 or more on the [Prediabetes Risk Test](#)
- (Watch this short video about [Taking the Prediabetes Risk Test.](#))

Montana participants of the DPP may qualify for payment coverage through Medicare, Medicaid, private insurance, private pay, or other sources.

How to qualify as a Medicaid provider of the DPP?

Eligible provider groups are:

- Physicians;
- Mid-level practitioners;
- Registered dietitians who also hold a current Montana license as a nutritionist;
- Hospitals;
- Federally Qualified Health Centers;
- Rural Health Clinics;
- Indian Health Services/Tribal Health Services;
- Groups/ Clinics; or
- Public Health Departments.

Potential providers must contract with the Montana DPP through the Public Health and Safety Division of Montana Department of Health and Human Services.

Contact [Sonja Tysk, Montana Diabetes Program Health Education Specialist, email STysk@mt.gov](mailto:STysk@mt.gov) or telephone (406) 444-0593.

Eligible providers must meet the following requirements:

- Have a trained lifestyle coach on staff delivering standardized curriculum and reporting data to the Public Health and Safety Division of the Montana Department of Public Health and Human Services.
 - The lifestyle coach must be a Registered Dietician **OR** a Certified Diabetes Educator.
- Provide the group-based National Institutes of Health Diabetes Prevention Program as adapted by the Public Health and Safety Division of the Montana Department of Public Health and Human Services.
 - Diabetes disease prevention services provided in the following format:
 - Core Program: 16 weekly sessions delivered in first 6 months of the program, and
 - After Core Program: 6 consecutive monthly sessions
 - Physical activity coaching to prevent diabetes
 - Group nutrition counseling to prevent diabetes
- Telehealth cohorts must provide live interaction, via technology, with the lifestyle coach following the same protocol as in-person cohorts.

Providers are encouraged to implement or increase the utilization of the prediabetes risk test and/or completing a blood glucose test to screen patients for prediabetes and refer to a National DPP.

Funding of up to \$5,000 is available for your clinic to implement a project to increase referrals and participation in the National DPP. For information on this funding opportunity, [contact Melissa House email Melissa.House@mt.gov](mailto:Melissa.House@mt.gov) or telephone (406) 444-9154, or visit the [DPP website https://dphhs.mt.gov/publichealth/Diabetes/DPP](https://dphhs.mt.gov/publichealth/Diabetes/DPP) to download the application.

Tips for screening patients:

- Use waiting time to administer the paper risk test.
- Consider giving the test verbally instead of giving patients a paper copy to fill out. This approach may help establish a connection with patients and make it easier to personalize your recommendations. The risk test typically takes about 2 minutes to complete.
- It is better for participants to enroll in the National DPP on the basis of blood glucose test results. You should encourage a blood glucose test for any patient who scores high on the risk test.
- All adults can take a prediabetes risk test. Patients who take medications or who have health conditions that may put them at higher risk of prediabetes should be given special consideration.
- Administer a blood glucose test to all patients who score high on the risk test or refer them to a health care provider for blood glucose testing.

DPP is a covered service by Montana Medicaid.

Medicaid Limitations

- Providers must be enrolled in the Montana Medicaid Program.
- Providers must be approved and contracted with the Montana Department of Public Health and Safety Division.
- Providers must adhere to the following:
 - Montana Medicaid State Plan, effective date 07/01/16, and Administrative Rule of Montana (ARM 37.86.5401-5404)
- Group outpatient DPP claims are limited to one session per person per day.

Medicaid Reimbursement

- Submit claim to Montana Medicaid on appropriate claim form for provider type:
 - CMS-1500
 - UB-04
- Revenue code 942 (Education)
- Procedure code 0403T
- Reimbursement effective July 1, 2020 – \$29.90

Providers are encouraged to refer eligible Montana Medicaid members to a National DPP. A list of active Montana Medicaid DPP providers is included on page 4 of this provider notice following the Contact Information section.
